

Heatizon Systems award winning floor warming products deliver radiant heating comfort to cold floors. Heatizon Systems ZMesh or Tuff Cable heating elements are designed to go under virtually all floor coverings, including carpet, wood, stone, marble and tile. Heatizon Systems provides the luxurious and comfortable radiant warmth of the sun to all of the occupants and contents of a home or building.

COMFORT

Feel the radiating warmth of the sun any time you desire. Heatizon's luxury radiant floor warming systems provide quiet, constant, and uniform heat to otherwise cold surfaces leaving them comfortable to the touch.

QUALITY

We have gone to great lengths to produce the longest lasting heating elements in the industry. The entire Heatizon system is solid state, has no moving parts to wear out, and has nothing that requires routine maintenance. Tuff Cable and ZMesh heating elements are the most durable available and are backed by a generous industry leading 25 year limited warranty.

EFFICIENT

Utilizing 100% of the energy to create heat, Heatizon Systems are incredibly energy efficient.

REPAIRABLE

Heatizon Systems award winning heating elements Tuff Cable and ZMesh, are easily repairable should they get accidentally damaged.

SAFE

Step out of your shower with peace of mind, knowing your wet floor is safely warmed with one of Heatizon Systems low-voltage radiant technologies that conform to the standards established by ETL, CSA and UL. Many of Heatizon Systems low voltage products have computer technology to safely monitor your floor warming system day and night.

EASY TO INSTALL

All Heatizon Systems products have been designed for ease of installation.

VERSATILE

Heatizon Systems makes radiant floor warming products that fit any sized or shaped area, and to go under any floor covering or in any cementitious material like concrete or thinset. Heatizon Systems also has radiant floor warming products designed to be installed in the joist space below the subfloor.

Heatizon utilizes two heating element technologies in order to provide the safest, highest quality and longest lasting floor warming systems available world wide. ZMesh goes "on" something, while Tuff Cable goes "in" something.

TUFF CABLE

ZMESH

APPLICATIONS

- Cabins and homes
- Basements
- Sunrooms
- Beach homes
- Additions or remodels
- Retrofit
- Remote locations
- Commercial, industrial and residential buildings

FEATURES

- Easily zoned
- For small and large areas
- Virtually no floor build up
- No vents or duct work
- No oil, gas, or propane required
- Minimal utility space requirements
- Quiet
- Easy to install
- No dust
- Installs on existing subfloors
- Safe low-voltage technology

INSTALLATION

- Sub-floor
 - In new concrete
 - On existing concrete
 - Wood
- Floor Coverings
 - Carpet
 - Hardwood
 - Laminate floorings
 - Tile
 - Stone
 - Marble
 - Stained Concrete

CUSTOMER SERVICE

Our highly experienced technical support teams are the best in the business. We also manufacture a family of driveway snow melting, radiant space heating, and roof deicing systems. In Canada Call Power Plant Supply Co 902 435 9899 we'll be happy to assist with product selection.

Heatizon Systems

Whether you are just heating a new addition or sunroom, remodeling a home, or heating an entire building, Heatizon Systems' low voltage radiant heat offers the comfort, safety, and reliability you expect from a luxury heating system.

COMFORT FOR YOUR HOME

Unlike conventional heating systems, our radiant heating products produce a clean, quiet, and uniform heat that transforms cold floors and furniture into heat emitting objects. This eliminates air drafts and limits heat loss, creating an even, luxurious warmth from head to toe. Take off your shoes and relax with Heatizon.

SAFETY FOR YOUR FAMILY

Heatizon's patented low voltage technology is among the safest space heating product in the industry. Not only do our systems incorporate gentle low voltage warmth throughout your floors, but only Heatizon has a built in safety computer that constantly monitors the operation of your system, insuring the safety of you and your loved ones.

WORRY FREE RELIABILITY

The entire Heatizon Systems product line is solid state, has no moving parts to wear out, and has nothing that requires routine maintenance. In addition, our quality heating elements are the longest lasting available and are backed by an industry leading 25 year limited warranty. Completely eliminate winter heating maintenance with the most reliable heating source available.

EFFICIENCY

Utilizing 100% of the energy it draws to create heat, Heatizon Systems are incredibly energy efficient. Our systems also radiate heat directly towards room occupants allowing them to be comfortable at lower thermostat settings. And because radiant heat energy is stored in your floor and other objects, warm temperatures are easily maintained, resulting in low energy consumption.

What is radiant heat?

Radiant in-floor heat feels like you have captured the power of the sun for your home! Like sun rays, radiant heat can travel in any direction and is unaffected by gravity. This keeps the warmth in areas of your home where you need it most, warming people and objects first before warming air. As a result, occupants are more comfortable at lower temperatures requiring less energy. In addition, in-floor radiant heat eliminates cold floor coverings, adding a luxurious touch of warmth to your home.

Installed directly under most floor coverings, Heatizon Systems radiant floor heating products provide simplified installation procedures and minimal impact upon other trades during construction. They are also easy to incorporate into new construction as well as remodeling applications. These systems have been used for commercial, residential and industrial applications world wide.

ACTIVATION

An easy to use, fully programmable thermostat is provided with your Heatizon System. These thermostats allow for sensing either floor or air temperatures and provide settings for multiple day and multiple time functions. This will completely automate your system making it efficient and worry free. More advanced controls for telephone activation are available.
